ABOUT Moderngas Italy – BGB.

The **Moderngas Italy – BGB**, is a company (Ltd.) that was founded in 2024 and is the result of a merger between Modern Gas (Egypt) and BGB (Italy). The company stands out for its expertise in the construction of natural gas networks and systems, as well as the development of pressure reduction stations.

The company also has the capability to provide specialized technicians to meet the needs of the Italian market in the energy sector, particularly in natural gas.

Modern Gas SHAREHOLDERS

Modern Gas was incorporated on 5/7/2021 as an Egyptian joint stock petroleum company, after the merger of Cairo Gas, Regas and Sinai Gas on purpose of implementing natural gas projects such as establishing, managing and operating natural gas pressure reduction stations and installations as well as preparing natural gas for distribution to customers and receiving natural gas from the work sites and delivering it to industrial, commercial and domestic customers.

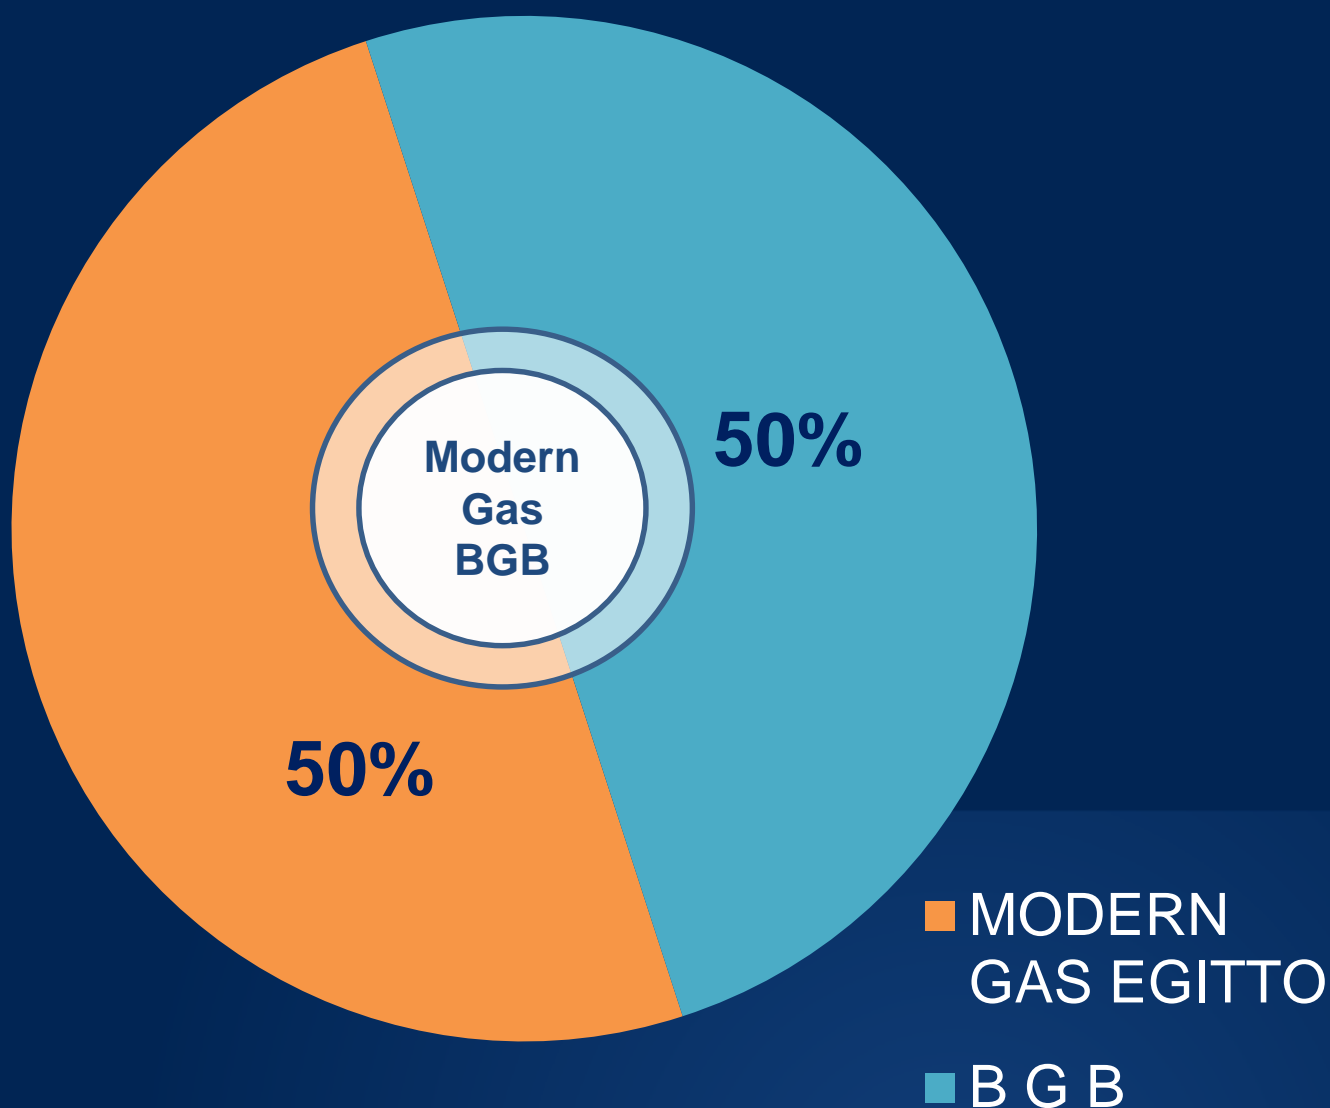

BGB has extensive experience in the field of procurement and oil services in the Italian and European markets

VISION STATEMENT

**To Provide innovative
Construction Solutions in
energy and Petroleum Sector.**

VISION

MISSION STATEMENT

**Our mission is to provide Latest
Energy solutions in additionally
delivering a comprehensive
portfolio including MEP, LPG,
Natural Gas, and Medical gases ,
becoming Leading player in the
energy sector.**

MISSION

OBJECTIVE

To maximize our role at a global level in the energy sectors especially natural gas and to meet the needs of the Italian market.

OBJECTIVE

VALUES

1-Customer-Centricity: Our Clients Are At The Heart Of Everything We Do. We Prioritize Their Needs And Work Tirelessly To Exceed Their Expectations.

2- Safety: We Adhere To The Strictest Safety Protocols To Protect Our Employees, Clients, And The Communities We Serve.

3-Sustainability: We Are Dedicated To Sustainable Practices That Minimize Our Environmental Impact And Contribute To The Long-term Well-being Of Society.

Our Company

SCOPE OF WORK

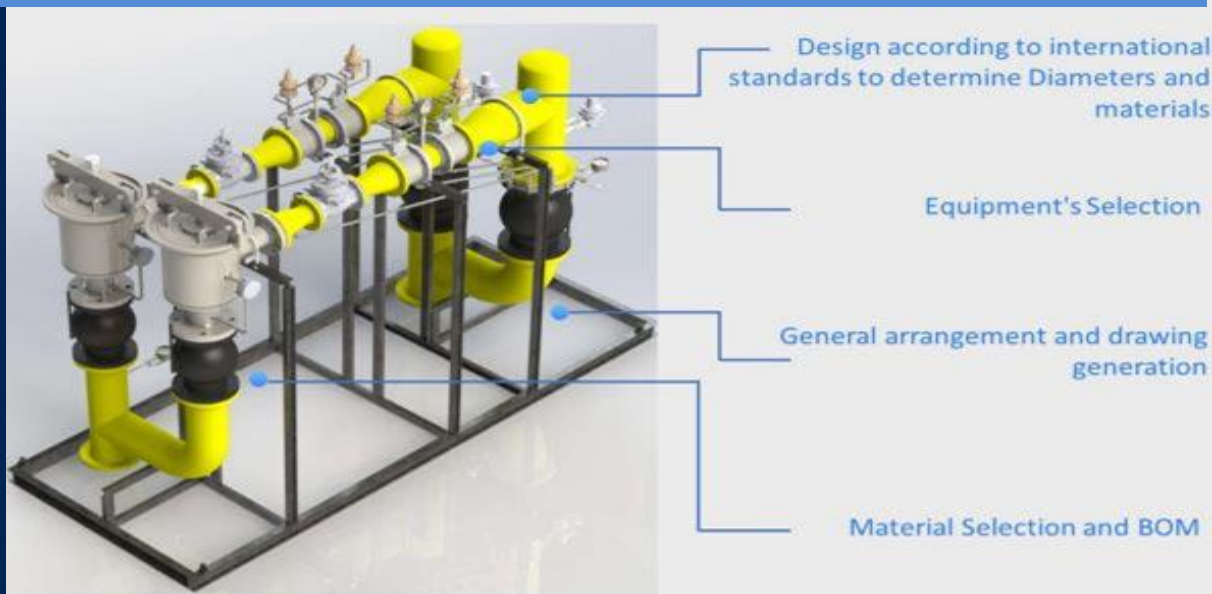

- Natural gas distribution networks
- Engineering services
- Pressure reduction systems (natural gas)
- Pipe work
- Engineering & design
- Construction
- On-site activities
- Station operation
- Technical support
- Maintenance
- Consulting
- Construction projects
- Instrumentation control

ENGINEERING SERVICES

Gas Pressure Reduction Systems and Piping Engineering:

- Conceptual design
- Plot plans & equipment location plans
- Piping general arrangement drawings for the above ground piping Tower, vessel, tank, etc....
- Orientation drawings Isometrics for all lines
- Stress analysis reports for critical lines using the Caesar 11 program & pipe support design
- Piping material specification, supply specification for packages
- MRQs and MRPs preparation Bulk material quantifying
- Underground piping design for all U/G piping systems
- Updating of drawings and 3D CADD model to "AS- BUILT" status
- Field assistance for construction and start-up
- Detailed & block plastic model building

Aviation Fuel Solution Airports

- **Modern Egyptian Natural Gas Company** specializes in providing comprehensive aviation fuel solutions and excels in airport-related projects.
- With a proven track record, our company has successfully undertaken and completed various assignments in airport operations, demonstrating expertise in fuel management, infrastructure development, and maintenance within the aviation sector. Our commitment to quality and efficiency positions.

Global Maintenance Plant shutdowns and Turnarounds

Preventive, Predictive, and Corrective Maintenance for all disciplines

Modern Egyptian Natural Gas Company's Maintenance Operations provides this service in:

- Refineries
- Petrochemicals
- Fertilizers
- Gas and oil processing plants
- Water treatment plants.
- Power plants.

Modern Egyptian Natural Gas Company Maintenance Operations provides this service in Petrochemicals for its top clients :

- ANRPC
- SIDPEC
- OPC
- ELAB

- EPPC
- E-STYRENE
- E-Methanex

Protection of Gas Pipelines which exposed for -West and East Alexandria	GASCO

PROJECTS FOR WATER TREATMENT

Water Treatment main capabilities

- **Desalination plants** turn seawater into drinking water, but also pump hypersaline water back into the environment.
 - **Sewage treatment plant works** by breaking down solid waste to produce a cleaner, more environmentally friendly effluent.
 - Raw water entering an **industrial plant** often needs treatment to meet tight quality specifications to be of use in specific industrial processes.
- Used in onshore and offshore developments, **water injection** involves drilling injection wells into a reservoir and introducing water into that reservoir to encourage oil production.
- **Produced water** is a term for reservoir water that is produced along with the oil and gas phase.
 - **Portable water** purification devices are self-contained, easily transported **units** used to purify water from untreated sources (such as rivers, lakes, and wells) for drinking purposes.

Design, Supply, Installation, Operation Support And Implementation Of Sewage Plant In Hood Negih With Capacity Of 6000 M3/Day To Take Part In Sustainable Sewage Services Program In Countryside (SRSSP) In **Al-sharqiyah Governorate**.

VALUE: 7 Million USD

Design, Procurement, Installation Chlorine Unit & Electromechanical Works In **MK Water Treatment Plant - Portsaid**

HSE

Système de gestion environnementale

La société égyptienne moderne de gaz naturel se concentre sur la réduction des effets négatifs des activités normales d'exploitation et de construction, en tenant compte de tous les défis environnementaux et des réglementations qui sauvent des vies

Règles de sauvetage

LIFE-SAVING RULES

Bypassing Safety Controls

Confined Space

Driving

Energy Isolation

Hot Work

Line of Fire

Safe Mechanical Lifting

Work Authorisation

Working at Height

La compagnie égyptienne moderne de gaz naturel veille à ce que chaque individu se conforme aux réglementations et aux procédures d'urgence qui sauvent des vies, en reconnaissant sa responsabilité personnelle, en signalant ce qu'il considère comme des actes dangereux et en s'assurant qu'il est apte au travail

PROCESS SAFETY

Modern Egyptian Natural Gas Company achieved the highest levels of safety and occupational health in terms of the safe working hours at the sites of project implementation as well as the safe mileage traveled to the Company's sites and buildings.

SAFETY STATEMENT

The company is committed to complying with the legal and enforceable occupational safety and health requirements through the following:

- Protect the health and safety of workers by strengthening the conditions that make workplaces free of accidents, reducing the chances of exposure to dangerous conditions, taking preventive measures and providing health care.
- Performing all activities and works in a safe and healthy manner.
- Perform work on the basis that all accidents that may cause injury, damage or property damage can be prevented.

SAFETY STATEMENT

- Report and investigate all accidents, including accidents that do not result in injuries or material damage, and implement all recommendations to prevent their recurrence.
- Develop safety and health rules and instructions and maintain their application to reduce the possibility of injuries, health damage or damage to property, and that all workers at all levels are fully responsible for their knowledge of these rules and instructions as well as responsible for following and applying them with regard to the field of work and the competencies assigned to them.
- Supervising the design, construction, operation, maintenance and maintenance of (equipment - devices - facilities) through the application of effective safety and environmental management systems so as to achieve protection for the environment and the health and safety of workers and others present in the workplace.
- Develop audit and control systems and ensure their continuity, which includes periodic review to ensure that the policy and management systems for occupational safety, health and the environment are applied correctly and on a permanent basis and are continuously developed.

Sustainability

Modern Egyptian Natural Gas Company Achieves Each Goal Of Sdgs By Integrating It Into Core Business Operations And Identifying Opportunities To Collaborate With Other Stakeholders And Leverage Experiences And Resources In Support Of The Sdgs.

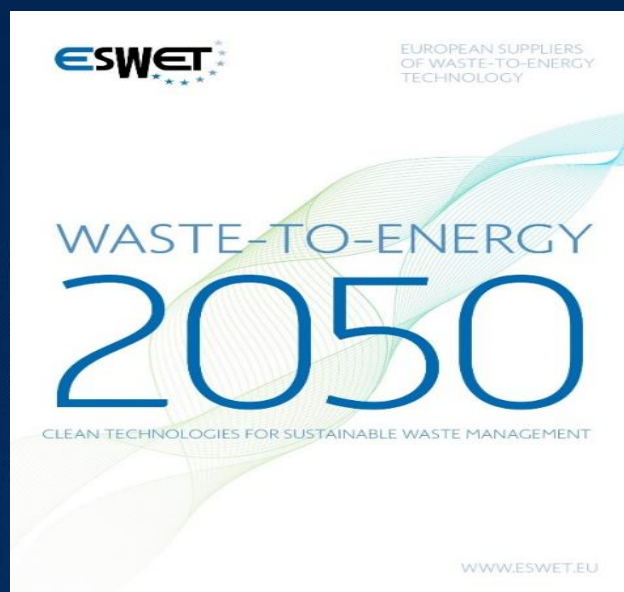

Sustainability Remains Firmly Embedded In **Modern Egyptian Company Natural Gas** Strategy, Whether Through Reducing Emissions, Protecting Employee Safety Or Securing New Data-driven Process.

NEXT PROJECTS IN ITALY

Based on the experience of **Modern Egyptian Natural Gas** in many fields, through technical and engineering expertise and qualified labor, as we mentioned, the company aims to expand its foreign projects and make Italy the new frontier it seeks. The Egyptian company Modern seeks to be part of and a partner in the realization of this vision.
